# BADGER DAYLIGHTING

**Successfully solving waste water issues since 1994**

As industry leaders, Badger Daylighting™ has invested in cutting-edge diagnostic technology and CCTV trucks to deliver accurate and advanced inspection reports. Badger inspects waste water infrastructure for damage, adherence to building codes and development permits, many times without incurring the cost of ripping up roads to investigate. Badger's purpose-built Flusher trucks are custom designed and manufactured in-house to flush and remove large volumes of debris blocking sewers and storm water drains.

Municipal, commercial, industrial and residential clients rely on Badger Daylighting™ for their sewer inspections and maintenance. Whether faced with an emergency situation or a long-term program of work, Badger Daylighting™ will provide a fast, high-quality, cost-effective solution.

## **BADGER PROVIDES SAFE, RELIABLE SOLUTIONS FOR YOUR SEWER SERVICES**

Whether you require a quick survey inspection or a long-term project, Badger Daylighting™ is equipped to do it all. We specialize in providing fast, high-quality service in the following areas:

- CCTV Inspections
- Mainline to Lateral Inspection
- Flushing and Cleaning
- Smoke Testing
- Air Testing
- Mandrel Testing
- Reaming & Concrete Removal
- Laser Profiling
- Sewer/pipeline locating
- And many more...
